MANAGER'S REPORT

- MSW has slowed down significantly this month, this is not unusual for this time of year.
- The weather has made it difficult to haul tire shred to the new cell, but on the flip side with the nice weather, we were able to use the pumps and drain all the water out of the cell. This will help Western Tank when they come to repair the cloth.
- Q&M is hauling steady still, the weather is allowing them to move about 700 tonnes a day. This is helping with the MSW being so slow this month.
- We experienced an issue with the new scale and software, but the support teams from both sides were amazing and fixed the problem.
- The new employee starts on the 23rd, she is very excited to be coming here. We intend to train her on everything here.
- I have finished reviewing the 400-page renewal documents for AEP for our operating license and only found a few things we needed to change or add. The engineering group is now finalizing the document and will submit 3 months earlier than necessary.

- I had a gentleman come and do an analysis on our leachate ponds, to see if there is a way to speed up the process of evaporation. I am waiting on his report and will update everyone once I have reviewed the information.
- I was to attend a meeting with all the managers of landfills, but the meeting was canceled. Also, that day I was going to attend a meeting on the waste to energy proposal, but that was also canceled due to weather.
- I made a call to (CAO of E-360) to talk about recycling and where E-360 fits in and her thoughts. She informed me that as of Oct 1/2026 E-360 will be cut out of the recycling and GFL will be awarded the recycling moving forward.
- Recycling at the Eco Center continues to run issue free.
- Crownsnest Pass has gotten better, this month we saw a lot less garbage in and around the bins.
